**PectaSol-C Modified Citrus Pectin**

**Instructions**
PectaSol-C Modified Citrus Pectin (MCP) is designed to be taken on an empty stomach, at least 30 minutes before or after food, supplements and/or medications. The powder can be mixed with any room temperature or warm liquid. It is best to stir immediately with cool or warm water.

**Supports Healthy Cells & Blocks Galectin-3***
Ongoing scientific research demonstrates PectaSol-C’s natural ability to support healthy cell growth and behavior by binding galectin-3. MCP is a natural ligand for galectin-3, a molecule present in large numbers on the surface of unhealthy cells. *

**Supports a Healthy Immune System***
PectaSol-C MCP contains components which, research has demonstrated, support a healthy immune system.*

**Removes Toxic Heavy Metals***
Published in 2006, a clinical trial demonstrated PectaSol-C MCP’s ability to bind and remove toxic heavy metals from the body, without affecting essential minerals. Heavy metal removal with PectaSol-C MCP has been shown in multiple case studies to play a potential role in ongoing health maintenance. A hospital study in 2008 reported that PectaSol-C significantly decreased toxic lead levels.*

**Unique Modification Process**
Only PectaSol-C MCP is produced using a proprietary process that carefully controls the weight and structure of the pectin molecules. The result is Modified Citrus Pectin with a specific low molecular weight range less than 15 kilodaltons and a low degree of esterification. This means that it is readily and effectively absorbed into the bloodstream, where it can actively promote cellular health. Regular pectin is found in many fruits, but cannot be absorbed into the bloodstream due to its large molecular size.*

**Patented**
PectaSol-C MCP is a special class of pectin developed by Dr. Isaac Eliaz, M.D., M.S., L.Ac. Dr. Eliaz has researched and published articles on modified citrus pectin for over a decade. PectaSol-C® MCP is protected by US patents #6,274,566, #6,462,029, and #7,026,302.

**Manufacturing and Quality Control**
PectaSol-C® MCP is produced under conditions that meet or exceed good manufacturing practices (GMP) as defined by the FDA.

**Contraindications and Cautions**
Research has shown no toxicity in short or long term use. Since PectaSol-C MCP is a dietary fiber, some individuals may experience loose stools at the start of use. Although there are no known drug interactions with PectaSol-C MCP, it is recommended that it be taken separately from other medications. In the production of PectaSol-C MCP, the ratio of sodium to potassium is carefully controlled to resemble the ratio naturally present. People with a health condition requiring the restriction of potassium or sodium should consult their health care provider before using this product. If you are nursing, pregnant or considering pregnancy, you should consult your healthcare professional prior to using this product.*

---

**What is PectaSol-C?**
PectaSol-C is the most advanced and effective Modified Citrus Pectin (MCP) supplement available. Proven to be a safe, gentle and highly effective formula, extensive clinical and scientific research has shown that PectaSol-C MCP can:

- Bind & Block Excess Galectin-3 Molecules*
- Promote Healthy Cell Growth & Proliferation*
- Support Healthy Immune Responses*
- Promote Gentle Detoxification*

**What is Modified Citrus Pectin?**
This natural product is derived from the pith of citrus fruit peels, including lemons, limes, oranges and grapefruits, and is modified using a proprietary enzymatic and pH process. This unique modification process guarantees that PectaSol-C MCP has the correct molecular weight necessary to promote optimal cellular health of the breasts, prostate, lungs and more.*
