

## Ther-Biotic® D

### High-CFU probiotic adjunct for detoxification protocols

Ther-Biotic® Detoxification Support is a high-CFU probiotic supplement designed to assist the body's natural gastrointestinal (GI) detoxification process.<sup>†</sup> It may also be used to provide support during detoxification protocols, such as prescription medications or heavy metal chelating agents.<sup>†</sup>

Normally, the human GI tract is populated by hundreds of different species of microorganisms that are important for healthy GI and immune function. However, the delicate balance of these organisms in the gut can be altered by prescription and nutritional detoxification agents, stress, and other factors, which may affect digestive and immune function. In addition, use of detoxification agents may result in a temporary increase in release of toxins and metabolic by-products into the digestive tract which need to be efficiently cleared from the system.

The beneficial types of live bacteria supplied by Ther-Biotic® Detoxification Support can help:

- **Promote a healthy balance of intestinal microbiota:**<sup>†</sup> Ther-Biotic® Detoxification Support provides an ultra-high CFU blend of 3 different types of “friendly” bacteria. These probiotic microorganisms have been shown to produce substances that create an environment that favorably shift the balance of gut microbiota towards more beneficial species.<sup>†</sup> These beneficial microorganisms also compete with bacteria and yeast for nutrients and attachment sites, thus helping keep these organisms under control.<sup>†</sup>
- **Support natural detoxification processes:**<sup>†</sup> The gastrointestinal tract plays a major role in keeping internally produced and external toxins from entering the systemic circulation. Optimal functioning of the gastrointestinal system allows for efficient elimination of toxins, which is important to the health and integrity of intestinal cells and other body tissues. Ther-Biotic® Detoxification Support can help aid the body's normal detoxification processes by supporting optimal gastrointestinal function, promoting bowel regularity, and by metabolizing or reducing uptake of toxins from the gut, thus facilitating their elimination from the body.<sup>†</sup>
- **Support immune function:**<sup>†</sup> It is important to support the immune system during environmental or metabolic toxin exposure. The 3 different probiotic species (*Lactobacillus rhamnosus*, *Lactobacillus casei*, and *Bifidobacterium bifidum*) in this product help support immune function in several ways: by enhancing innate and acquired immunity, by modulating immune tolerance, and by augmenting GI immune responsiveness.<sup>†</sup>

Ther-Biotic® Detoxification Support is free of the following common allergens: milk/casein, eggs, fish, shellfish, tree nuts, peanuts, wheat, gluten, and soybeans. Contains no artificial colors, flavors, or preservatives.

Ther-Biotic® Detoxification Support may be useful for individuals who wish to naturally support intestinal detoxification mechanisms.<sup>†</sup> This product can also serve as an important probiotic adjunct during and following use of prescription medications or heavy metal chelating compounds. This formulation is often suitable for those adhering to the Specific Carbohydrate Diet (SCD™) program.

#### Formula:

**Medicinal Ingredients (quantity per capsule)/  
Ingrédients médicinaux (quantité par capsule):**  
*Lactobacillus rhamnosus* (2.0 x 10<sup>10</sup> CFU/UFC)  
*Lactobacillus casei* (2.0 x 10<sup>10</sup> CFU/UFC)  
*Bifidobacterium bifidum* (1.0 x 10<sup>10</sup> CFU/UFC)

**Non-Medicinal Ingredients/Ingrédients non médicinaux:**  
Hypromellose  
Purified water/Eau purifiée  
InTactic® proprietary polysaccharide complex/  
Complexe breveté de polysaccharides InTactic®  
L-Leucine

**Route of administration/Voie d'administration:** Oral/Orale

**Recommended dose/Dose recommandée:**  
Adults, adolescents, and children (1 year old and older)/  
Adultes, adolescents, et enfants âgés de 1 an et plus:  
1 capsule 1 time per day/1 capsule 1 fois par jour

**V770-06-CN 60 vegetarian capsules**

<sup>†</sup>These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

**Suggested use: Adults:** 1 capsule daily with food or as directed by a healthcare professional. **Children:** As directed by a healthcare professional. **Caution:** If you are pregnant, nursing, have a medical condition, or taking prescription drugs, consult your healthcare professional before using this product. Keep out of reach of children.

Contains InTactic® polysaccharide complex that may not be suitable for strict adherence with SCD™ protocols.

#### **About InTactic® acid-stable technology**

Ther-Biotic® Detoxification Support contains InTactic®, a highly purified vegetarian polysaccharide material of marine plant origin which forms a gel-like matrix that surrounds and protects probiotic bacteria from destruction by gastric acid. This allows the friendly probiotic bacteria to survive the stomach acid and be delivered alive into the small intestines where they are released intact to exert their health-promoting function. As a result, high functional potencies of live friendly bacteria are delivered where they are needed.
