A Simple Detox for On-The-Go Patients

A liver detox for modern times needs to be accessible, effective and leave patients feeling supported. While a full dietary overhaul and long-term lifestyle change is preferable, it is not practical for every patient. This simple detox protocol is easily managed by even the most overwhelmed individual. Try this twice yearly, 2-week detox that only uses one bottle each of LivCo and Livton, two of the most renowned formulae from MediHerb.

Starting when the weather begins to get warmer (April/May):

In the morning take 2 tablets of Livton to stimulate digestion and support liver function. In the evening take 2 tablets of LivCo to protect the liver and promote detoxification. **Continue for 2 weeks, using ½ of each bottle.**

Starting when the weather begins to get cooler (September/October):

In the morning take 2 tablets of Livton to stimulate digestion and support liver function. In the evening take 2 tablets of LivCo to protect the liver and promote detoxification. **Continue for 2 weeks, using ½ of each bottle.**
